

Become a PRO Landscape Partner

Drafix Software, maker of PRO Landscape design software, is always in search of quality green industry partners. PRO Landscape software is marketed across the world to professional landscape contractors, designers, and garden centers. PRO Landscape's photo imaging allows these designers to show their customers a realistic image of the proposed landscape using a picture of their own property.

PRO Landscape currently has over 6,000 high quality objects in its image library. These images include plants by climate zones, pavers, statuary, outdoor furniture and structures, pools, water features, and other outdoor equipment.

You have a great opportunity to participate in the popularity of PRO Landscape by becoming a partner. Our customers would like to see your product images added to our image library.

Benefits to You

- *Free marketing to thousands of landscape designers who will spec your products into their designs.*
- *There is absolutely no cost to become a partner.*

How the Program Works

- *Provide us with high quality images of your products.*
- *Include part numbers and pricing if applicable.*
- *Drafix Software will add your products to the next version of PRO Landscape.*
- *The images will include your company name and a link to your web site.*
- *Your company logo and web address will be displayed on PRO Landscape web site.*

If you have any questions regarding this partnership or technical specification of images, please contact Amy Lobb or Gary Correll at (816) 421-6678 or by email at images@prolandscape.com.
