

# WHAT'S NEW IN VERSION 9?

## **IMAGE EDITOR**

### ***Image Editor has a new user interface***

New content librarian allows drag and drop of objects. New tabs for common object libraries, makes it easier and faster to locate objects. Now you have a choice of showing common name or botanical name.

### ***Improved database of images***

Our recent partnership with Horticipia® provides access to hundreds of new images and reference material.

### ***Plant images look much more realistic***

By using new rendering technology, we were able to make the level of resolution much higher with the images in our database. Thus, making your output that much more realistic for your customers.

### ***Other New Planner Features***

- Print Preview
- Ability to swap out background Image
- Negative Growth Feature
- Easy object selection and movement
- Ability to swap out the background image
- Ability to select plant sizes right in the drawing
- Pan and Zoom
- Interactive shadow settings
- Pattern Scaling
- Favorites Tab for fast access to materials you use most often

## **PLANNER**

### ***New Render Modes for dramatic presentations***

Planner now provides versatile output capabilities. User can change the look of a CAD drawing from one mode to another with a single mouse click. Choose from CAD, hand-drawn, pastel, watercolor, or photorealistic symbols.

### ***Customizable layers***

Allows the user to change the layer of a specific object or group of objects. This also allows for complete control of layers from AutoCAD drawings.

### ***Auto-Placement from your Image files***

Automatically create a CAD view of any Image Editor plan.

### ***Other New Planner Features***

- Updated AutoCAD support
- Ability to select plant sizes right in the drawing
- New DRAFIXSCRIPT Architectural Font
- Set transparency for rendered symbols
- New Property Lines and Walls Wizards
- Switch between common and botanical names
- New Legend options for common, botanical or both names
- Symbol Array rotates each symbol
- Favorites Tab for fast access to materials you use most often
- Edge stippling of patterns

## **PROPOSAL**

### ***Completely revamped Estimate module***

Create professional looking bids from a new easy-to-use interface.

### ***New reports help you manage your business effectively***

Report categories include:

- Customer Quotes-Professional looking quotes to give to your customers.
- Quote Status-Helps manage your open quotes to ensure you follow-up in a timely manner.
- Pricing-Print price lists.
- Supply Forms-Generate plant lists from a quote to give your supplier or for the yard to your pull materials.
- Customer Management-Top customers, customer lists, mailing labels, etc.

AND, DID WE MENTION THE NEW DRAFIXSCRIPT FONT???
